Dear Mr. Adugna Bekele,

My name is Awel Oumer, and I am from Addis Ababa, Ethiopia. I have always been fascinated by the power of the web to connect people and share information across the world. I am interested in web development because I want to create websites and applications that are user-friendly, accessible, and innovative. My motivation for applying for this scholarship is to pursue my passion for web development and learn from the best instructors and mentors in the field. I believe that this scholarship will help me achieve my academic and professional goals and contribute to the advancement of web technology in my country and beyond.

I am interested in web development because l want to create innovative and accessible solutions for the real-world problem. I have always enjoyed learning new programming languages, frameworks, and tools that enable me to create dynamic and interactive web pages. I also have a keen eye for design and aesthetics, and I like to experiment with different layouts, colors, and fonts to make my websites appealing and engaging. My desire to learn web development was sparked by the first website I ever created, which was a personal blog where I shared my thoughts and experiences as a student. I was amazed by how I could express myself and connect with others through the web. What motivates me to learn web development is the endless potential and possibilities that it offers. I want to use my skills and knowledge to create websites and applications that solve real-world problems, improve people's lives, and make a positive impact on society.

I believe that I am the best candidate for this scholarship opportunity because I have the strongest qualities and personal characteristics that distinguish me from everyone else. I am a hard-working, resilient, and passionate learner who never gives up on my dreams. I have overcome many challenges and obstacles in my life, such as poverty, lack of resources, and limited opportunities. Despite these difficulties, I have always strived to excel in my studies and pursue my interest in web development. I have taught myself web development(HTML and CSS) through online courses, books, and tutorials, and I have created my personal portfolio website that showcase my skills and creativity. I have also helped my friends in campus with python programing language that we have learned in first year freshman course. I have demonstrated my academic excellence, leadership potential, and social impact through my web development activities. I am confident that this scholarship will enable me to further develop my web development skills and achieve my goals.

I am ready for the challenges ahead of me as I begin this web development scholarship program. I have a strong work ethic, a growth mindset, and a willingness to learn from feedback and mistakes. I am not afraid to take risks, experiment with new ideas, and collaborate with others. I am also adaptable and flexible, able to cope with changing requirements and situations. I have proven my readiness for challenges through my major accomplishments in web development.

One of my major accomplishments is building my own portfolio website, which showcases my skills, projects, and achievements in web development. I consider this as an accomplishment because it demonstrates my proficiency in various web technologies, such as HTML and CSS. It also reflects my creativity, passion, and personality as a web developer. By creating my portfolio website, I have learned a lot about web design, user interface, and user experience. I have also received positive feedback and recognition from my peers, mentors, and potential employers. My portfolio website is a valuable asset that helps me stand out in the competitive web development industry.

This scholarship opportunity will help me achieve my career goal of becoming a professional web developer and creating innovative web solutions for social good. By participating in this scholarship program, I will gain access to high-quality education, mentorship, and networking opportunities that will enhance my web development skills and knowledge. I will also benefit from the exposure to the latest trends, technologies, and best practices in the web development industry. I will be able to apply what I learn to my own projects and portfolio, which will showcase my abilities and potential to future employers and clients. I will also be able to connect with other web developers and experts who share my passion and vision for web development. I will learn from their experiences, insights, and feedback, and collaborate with them on meaningful web development initiatives. This scholarship opportunity will open up new doors and possibilities for me to pursue my web development career and make a positive impact on the world.

My career goal is to become a successful web developer and a leader in the web development community. I plan to see myself in 10 years as a senior web developer at a reputable company or organization, working on challenging and impactful web projects that make a difference in the world. I also plan to start my own web development company or social enterprise, where I can create and implement my own web solutions for various social issues and causes. I also plan to be an active and influential member of the web development community, sharing my knowledge and expertise, mentoring and inspiring other web developers, and contributing to the advancement and innovation of web technology.

I am facing financial hardship that affects my ability to pay for this course. I come from a low-income family that struggles to make ends meet. My is a tailor who work hard to provide for me and my three siblings and my mother is a house wife. They have limited education and income, and they cannot afford to support my higher education. I have been working part-time with my father to help with the household expenses and save some money for my studies. However, my income is barely enough to cover my basic needs, let alone the cost of this course. I have also applied for other scholarships but I have not received any positive response so far.

This course is a great opportunity for me to learn web development and improve my career prospects, but I need financial assistance to enroll in it. I would greatly appreciate it if you could grant me this scholarship and help me achieve my dreams.

I am currently studying construction technology and management   at Addis Ababa University, and I am in my second year of the five-year program. I have a flexible and manageable academic schedule that allows me to allocate a minimum of 4 hours a day for this course. I plan to dedicate 1 hour and 30 minutes in the morning and 2 hours and 30 minutes in the evening for this course, every day of the week. I will use the morning hours to watch the video lectures, read the course materials. I will use the evening hours to review the concepts, practice the skills, complete the quizzes and assignments and work on the projects. I will also participate in the online forums and discussions, and seek help from the instructors and mentors whenever I need it and help other friends with my full potential. I am confident that I can balance my studies and this course, and make the better for this learning opportunity.

In conclusion, I am a passionate, dedicated, and motivated web developer who wants to learn from this scholarship program and achieve my career goals. I have attached the academic background, the personal qualities, and the professional experience that make me a suitable and deserving candidate for this scholarship opportunity. I have demonstrated my skills, creativity, and impact through my web development projects and activities. I have also shown my readiness and commitment to face the challenges and opportunities that this course will offer me. I am eager to join this program and become part of the web development community. I appreciate your consideration of my application and I hope to hear from you soon.

Best Regards,

Awel Oumer.
